

Les couleurs

Écoute. C'est quel numéro ?

HOW TO USE:

This is a listening activity that can be used by the teacher with the whole class, or equally by children with their partner.

The speaker says one of the words from the top line of the flow chart. This shows the listener which spur to follow. This leads them to another pair of words. Again they listen to see which spur to follow. They do this for all four layers, until they reach the bottom. They give the corresponding number as their answer, to show that they have heard all four words correctly.
