

Scrabble infinito

How to play Scrabble Infinito (Infinite Scrabble):

It can be played in pairs, in threes or even individually.

Student 1 writes their first word from your given list onto the Scrabble board. One of the letters must be on the grey central square.

Student 2 then writes their first word onto the Scrabble board. Their word must cross through Student 1's word just like in a normal game of Scrabble.

The students score points when their words go through numbered squares. Numbered squares can be used more than once.
