

Articles

Articles

How to revise using this resource:

Working with a friend or someone at home:

- Ask them to read the Spanish words and you say the English translations.
- Switch round - they say the English and you have to say the Spanish.
- Say a phrase in English or Spanish, and your partner has to write it in the other language on their paper or whiteboard.
- One of you writes on a piece of paper or a whiteboard one of the phrases (one thing from each box) and the other has to try to guess it in 10 guesses or fewer.
- Both write 5 phrases (each with one thing from each box) on a piece of paper or whiteboard. Take turns to read out your phrases and see if you have any the same.

Working by yourself:

- Read out loud each phrase in Spanish and then in English.
- Find some other nouns that would fit with these articles and write down some examples in Spanish and English.
